## TPK COMPANY REFERENCE LIST

LLC «TPK-Tsentr»  
Ukraine, 04073, Kyiv  
Pros. Stepana Bandery, 8  
Bldg 16-A, 5<sup>th</sup> floor  
Tel.: +38 (044) 492 90 00  
e-mail: info@tpk.ua  
www.tpk.ua

**TPK Company** is the largest Ukrainian supplier of painted metal products for enclosing structures of walls and roofs for civil and industrial engineering, as well as components for these structures. It has been present on the construction market for more than 25 years. Only in the last 5 years, it has produced and supplied roofing and facade materials with a total area of more than 20 000 000 m<sup>2</sup>.

**The company is specialized in the supply of ready-made solutions for enclosing structures of roofs and facades.**

**TPK Company** has its own modern production facilities producing a wide range of materials for roofs, facades and ceilings - metal tile roofing, profiled flooring (8 to 128), facade cassettes and panels, internal cassettes, including accessories.

The latest and most up-to-date solution are sandwich panels (wall and roof).

Sandwich panels are manufactured at the plant of **TPK Company** in Bila Tserkva, where a new production line from Robor is installed, which has been assembled in Italy and is unique for Ukraine. Robor is specialized in the design and manufacture of sandwich panel production lines. The line has been operating since 2009 and is one of the most up-to-date not only in Ukraine, but also in Europe. The production of sandwich panels is fully automatic - starting from the insulation supply to the cutting line for the production of lamellae to the final packaging. The production line features a 16-meter long heated plate press, which evenly heats the entire panel after attaching the glued metal with the filler, thus improving the quality of gluing. The line for stacking panels before packaging also has its characteristic features. It is designed to carefully stack the panels using special paws instead of suction cups, without tearing off the non-glued covers from the insulation.

The stacking line allows to manufacture wall and roof panels with mineral wool and polystyrene foam insulation with a thickness of 60 mm to 240 mm. Wall panels can be both open (1000 mm and 1180 mm wide) and closed lock type. Panels from 120 mm and above are provided with a thermal lock. Roof panels can be both standard type and with special trimming (overlap) for easy installation of transverse joining type panels. The thickness of metal is 0.45 mm to 0.7 mm depending on the panel specifications for a specific object. The customer can choose the type of coating. Each panel batch is checked for quality of gluing.

*You are kindly invited to visit our production site to make sure that we have the necessary technical capacity to fulfill orders, assess the performance of the production quality control system in place, starting from the feedstock quality and ending with the quality control of packaging and loading of products.*

You can also watch a short video about production on our YouTube channel: <https://youtu.be/49QuWltLy3M>

All our products comply with applicable standards and statutory requirements of Ukrainian law, which is confirmed by **TPK Company** having all the necessary certificates and protocols, which are available upon request. The production quality control system is certified according to **ISO 9001**.

The products have all the necessary permits in Ukraine, namely: conclusion of the Sanitary and Epidemiological Service, certificate of conformity, fire protocols.

Further details, TPK's quote and letters of recommendation about the company and its products can be found on the **TPK Company's** official website: [www.tpk.ua](http://www.tpk.ua)

The total volume of delivered products of own production in the major areas as of 2019:

- Sandwich panels - more than 2 000 000 m<sup>2</sup>;
- Profiled flooring - more than 1 850 000 m<sup>2</sup>;
- Metal tile roofing - 16 400 000 m<sup>2</sup>.
