

STRUCTURAL BOX PROFILE SHEET T85

The material is made of high-quality galvanized sheet steel or steel with a polymer coating. Universal product. Acts as a load-bearing element. It is used as a fixed formwork

Properties:

- Fire resistant and fireproof
- High load endurance
- High accuracy of sheet shape
- Eco friendly material
- Up to 50 years of service life
- Does not require additional maintenance in operation
- Quick and easy installation.
- High load endurance

T85-positive/T85-negative

Description:

Structural box profile sheet T85

The metal sheet profile T85 is made of the zinc-coated steel with or without polymeric coating. It is exploited as a fixed casing in flooring as well as in the design of roofing and fencing. It is widely known and common among the Ukrainian constructors and architects due to its potent bearing properties.

Applications:

Corrugated board is a classic solution for the construction of industrial and commercial buildings, both new and for reconstruction:

- industrial and commercial buildings
- shopping centers
- office buildings
- industrial buildings
- parking

Specifications:

Name	Structural box profile sheet T128
Steel grade	S320GD
Sheet thickness [mm]	0,70 - 1,25
Coat	PE
Useful width [mm]	1060
Overall width [mm]	1095
Wave height [mm]	82
Min. sheet length [mm]	300
Max. sheet length [mm]	12 000

Profiling:

positive

negative
